Innovative and digital

X-ray exposures are an important part of the examination and treatment process of your animal patient. It supports your reliable diagnosis and is the basis for operative surgery and check-ups.

A task that seems simple but is so complex, because your needs as a practice for big or small animals or as a veterinary clinic require different solutions.

Our X-ray solutions can be integrated into your practice, supporting your existing infrastructure innovatively and digitally. With state-of-the-art touch concept a benefit for your workflow.

Product guide

	VET-Clinic for small animals	Practice for small animals	Practice for big animals
X-ray Systems	PRS 300 VET TOUCH with stationary generator		Mobile generators
	PRS 500 VET	PRS 300 VET TOUCH with mobile generator	
Detectors	RAPIXX 43x43cm		RAPIXX 25x30cm
		RAPIXX 43x36/43x43cm	
Image Acquisition	CONAXX 2 VET		
	Special Feature small animals		Special Feature big animals
Image Diagnosis		CONAXX 2 VET Diagnostic Viewer	
	PROPAXX VET		

PRS 300 VET Touch Hybrid

The ideal system for practices with a focus on large and small animal care.
The use of a mobile X-ray generator in combination with a wireless DR detector and our image acquisition software CONAXX 2 VET allows you complete independence of location - if required, stationary use for small animals is possible as well.

CONAXX 2 VET

The CONAXX 2 VET acquisition software is intuitive to work with and logically structured. Customizable to your preferences and specifics, the software reduces your workload and you valuable time.

RAPIXX Series

When choosing your DR panel, we consider your wishes. Decide whether wired or WIFI in the detector sizes 25x30cm, 43x36cm or 43x43cm. We are pleased to provide you with more information!

Mobile Generator

Selectable in different power levels, the generator can be easily detached from the system without any tools. The transport to the site of operation takes place safely stowed in the corresponding aluminium case.

PRS 300 VET Touch stationary

The X-ray solution for your small animal practice! As a free-standing system, the unit not only offers the latest direct radiography technology in a minimum of space, it also actively supports you in ideal optimal patient positioning and operation. Due to the constructrion of the system, it can be installed within only half a day only.

CONAXX 2 VET

The CONAXX 2 VET acquisition software is intuitive to work with and logically structured. Customizable to your preferences and specifics, the software reduces your workload and saves you valuable time.

RAPIXX Serie

When choosing your DR panel, we consider your wishes. Decide whether wired or WIFI in the detector sizes 25x30cm, 43x36cm or 43x43cm. We are pleased to provide you with more information!

Touch Monitor

You control the entire system including generator directly at the system with our touch monitor. Time-consuming, additional activities are completely avoided and saves time.

PRS 500 VET

The X-ray system for veterinary clinics with high animal patient frequency. Quickly and safely positioning your animal patients using the floating tabletop and createing an X-ray image adjusted to your needs within seconds. The system assists you with a patient placement assistant and with integrated generator control.

CONAXX 2 VET

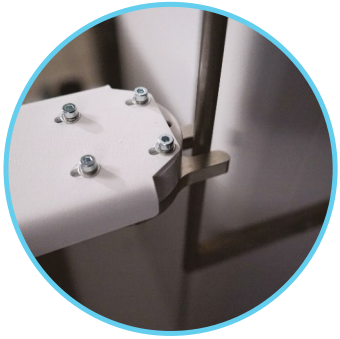
The CONAXX 2 VET acquisition software is intuitive to work with and logically structured. Customizable to your preferences and specifics, the software reduces your workload and saves you valuable time.

Touch Monitor

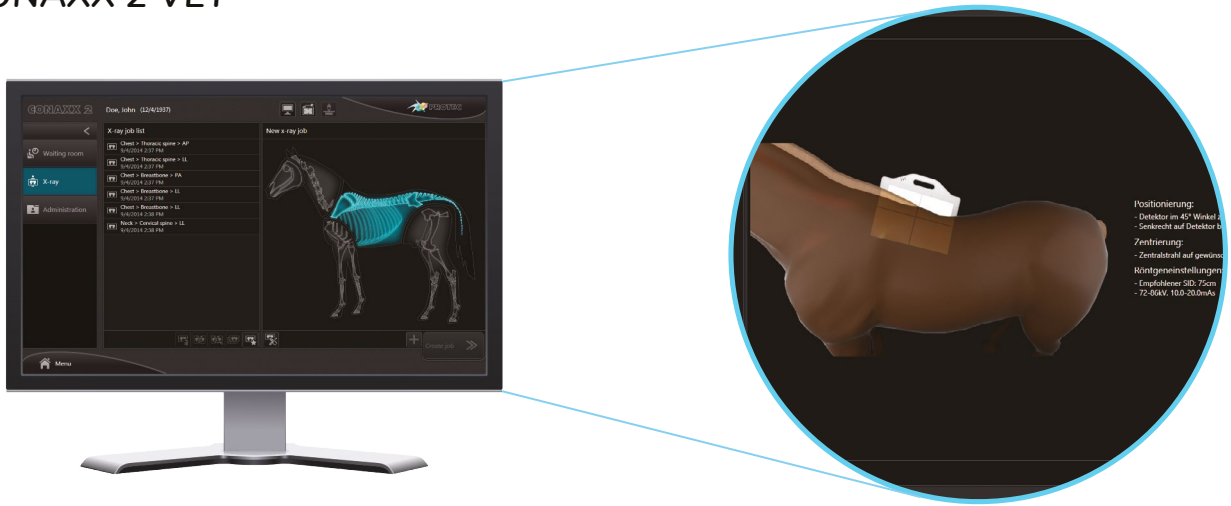
You control the entire system including generator directly at the system with our touch monitor. Time-consuming, additional activities are completely avoided and saves time.

Bucky Synchronisation

With the mechanical bucky synchronisation, your image acquisition device automatically remains in the central ray of the X-ray tube in the X-ray table.

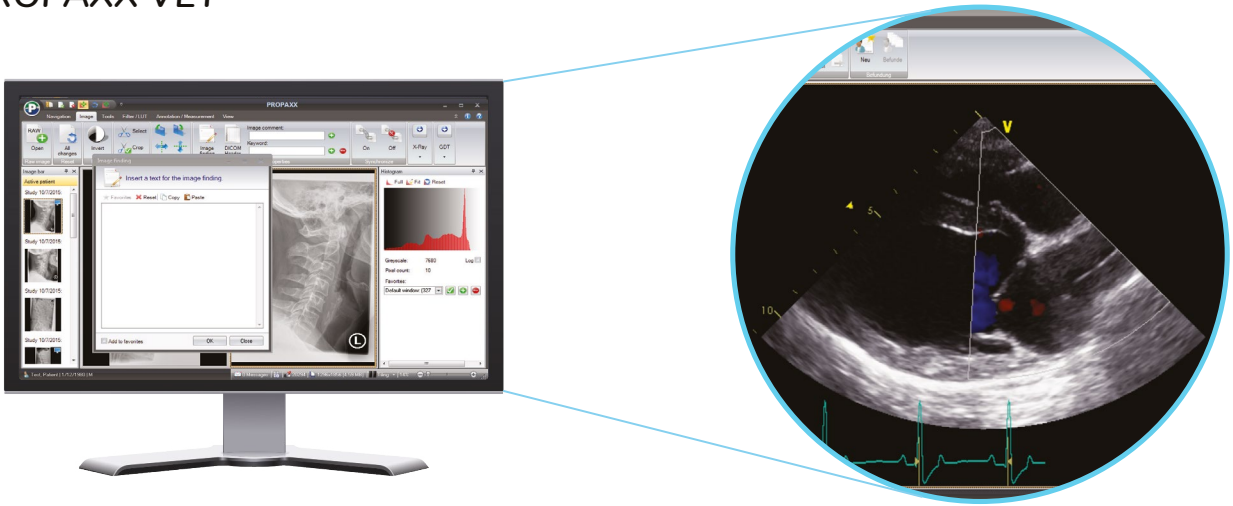


CONAXX 2 VET



The perfect X-ray image is always subject to personal consideration. Therefore our CONAXX 2 VET acquisition software considers for your individual preferences. In addition, the software takes over the central control of generator and detector settings and serves as an assistant for correct patient positioning.

PROPAXX VET



PROPAXX VET is your viewing, editing and archiving software. It offers you versatile and flexible assistance in the diagnosis of X-ray images. In addition to the wide range of functions for optimizing and analyzing image data, the software provides a number of useful administration and auxiliary tools. CT, MRI and ultrasound series can also be viewed and archived.

Worklist Server

The PROTEC Worklist Server acts as a mediating data interface between your patient information software and your various examination devices/systems. Coupled via HL7 or GDT/BDT interfaces, there are no limits to simultaneous distribution of information. The received examination data is stored centrally via the worklist server and forwarded to the connected examination systems such as ultrasound or MRI. Extensive filter criteria ensure the correct assignment of the desired examination jobs.

Compatible with different common software systems.

PROTEC - 35 years Made in Germany

PROTEC has been your constant partner in the field of X-ray technology for more than three decades. During this period we have acquired an expert knowledge which forms the basis in all areas of our activities.

Our efforts are focused on the creation of an ideal X-ray image for reliable diagnosis, whether analog or digital.

Quality and perfect service are our company principles.
